

## Calcium Bentonite Clay Tips & Testimonials from Perry A~

It's Perry A~ and I am back. Though we sold the Living Clay business in 2015, I have not retired from educating people to the plethora of uses of Calcium Bentonite Clay and answering their questions (512-773-0335 [perrya@perrya.com](mailto:perrya@perrya.com)) in an effort to understand this complicated natural substance. As I promised I will maintain the free clay information website [www.BentoniteClayInfo.com](http://www.BentoniteClayInfo.com). Since retiring from the webinars due to ongoing increasing expenses, I am picking up the slack by sending tips, articles, suggested protocols and new testimonials to share the magic of Bentonite Clay.

For a definitive guide to understanding and using clay I recommend my newest book *Calcium Bentonite Clay Nature's pathway to Healing – Balance, Detox, Stimulate, Alkalize*. You can order from [www.TheClayBook.com](http://www.TheClayBook.com) or [Amazon](http://Amazon.com).

Today's Tips & Testimonials is about Cirrhosis of the Liver

My 60 year old clean living husband had been diagnosed with Hep C and Cirrhosis of the liver. He only had 5 percent of his liver left. The Dr. told him to home and put his affairs together because he had 6 months to live. A friend told him about the clay and started him on a regimen of building up from 3 ounces of liquid clay 3 times a day to 1 cup clay 3 times a day and made him wear a poultice over his liver every night and bath every day. He did this for 3 months and he felt so much better. The Dr wanted to make him quit the clay because his liver enzymes count was going through the roof. He listened to his body and kept drinking the clay. By 6 months 30 percent of his liver grew back, he was no longer yellow, his urination problem gone, white blood cell count good, back to work full time and happy. At a year and a half his liver had grown back to 55%. His Hep C has improved too. – Wendy M.
